**HARTING Showcases Latest Technology at Virtual
“Communication Technology Conference”**

ELGIN, Ill. (April 1, 2009)— HARTING North America will participate in Newark’s (Premier Farnell) virtual *Live EDGE Awards Ceremony & Communication Technology Conference* on April 2, 2009. The free event, available globally live from 9:30am - 6pm EST, will be held in the [Live EDGE EcoSphere](#), a virtual environment designed specifically as a learning and networking community for design engineers, engineering students and hobbyists around the world. Registration is available now at <http://www.live-edge.com>

The ‘virtual tradeshow’ objective is to showcase the newest technologies from 29 leading component manufacturers in support of global environmental design. The winners of the [Live EDGE](#) (Environmental Design for the Global Environment) environmental design challenge will also be named by Harriet Green, CEO, Premier Farnell, at 9:45am EST.

Attendees at the event will have the opportunity to network with colleagues, download technical information, and chat live virtually with manufacturer representatives and technical experts. The HARTING ‘booth’ will feature product presentations, videos, technical articles, catalogs and more.

Updates about the event can be followed at http://twitter.com/LiveEDGE_Event prior to, and on the day of the conference.

The following HARTING personnel will be available for ‘cyber discussions’

Jody Williquette
Marketing Manager
8:30a - 4p

Rich Hanson
Application Engineer, Electronic
8:30a - 12p

Ed Garstkiewicz
Marketing Manager
1p - 4p

Shawn Coughlin
Field Systems Engineer, Auto IT
12p - 5p

Loren Gorski
Distribution Manager
2p - 5p

HARTING is one of the world’s leading manufacturers of connectivity solutions, with subsidiary and representative companies in 40 countries throughout the world. HARTING was founded in 1945 by the family that still owns the company, and continues to provide the best products and services to our customers. HARTING North America headquarters, based in the greater Chicago area, provides total connectivity solutions for markets such as telecommunications, broadcast & entertainment, transportation, factory automation and energy.
