

FOR IMMEDIATE RELEASE

Han-Quick Lock® - New Innovative Termination Technology

ELGIN, IL – HARTING's new termination technology combines reliability and simple handling with the space saving benefits of crimp technology.

Han-Quick Lock® is optimally designed for high contact densities and saves applied cost by reducing wiring time compared to screw terminals by 20 percent. No other technology is this simple, space-saving and fast. Additionally, this vibration-resistant termination requires no special tooling.

The first product equipped with the new termination technology is Han® PushPull Power 4/0. Further products will follow, including the Han® 4 A, Han® Q 5/0, Han® 7 D, Han® 8 D and Han® EE modules from our Han-Modular® range.

Suitable for markets such as renewable energy and factory automation, or any application that requires a field-installable connector.
